

Coconut Butter (Oil)

The Best Fat For Your Body—For Use Inside and Out!

The human body requires essential fatty acids to function but can't generate them on its own. If your diet doesn't contain enough lauric or capric acid, it's possible to experience any range of symptoms, including fatigue, poor memory, dry skin, heart problems, mood swings or depression, and poor circulation.

Cook with Coconut Butter, and Give Your Body Its Favorite Essential Fatty Acids!

Coconut Butter Supports...

- Skin conditions
- Memory and cognitive problems
- Energy production
- Aging
- Athletic performance
- Blood sugar levels
- Mental and emotional stability
- Hormonal function
- Cardiovascular health
- Colds and flu

For support, adults are recommended to ingest 1-2 tbsp. daily, or as directed by a healthcare professional. Can be used topically.
